Angelina County Fresh Water Supply District No. 1

Sewer Project Update

Bond Closure for Sewer Project—June 10, 2014

Special points of interest:

- Bond Closure
- Planning and Design Phase Begins
- District Exemption Application / Policy
- Construction Outlook / Timeline

The bond commitment for \$205,000 was signed and closed with the Texas Water Development Board (TWDB) on June 10, 2014. This commitment involved financial assistance from the TWDB for a total amount of \$674,013, of which \$469,013 involves loan forgiveness. This leaves Angelina County Fresh Water Supply District No. 1 (the District) responsible for paying back \$205,000 related to the Planning and Design phase of the new sewer project.

The first payment related to the newly issued bond is due on July 20, 2014.

KSA ENGINEERS

Engineering Services Begin—Planning and Design

The District has employed the services of KSA Engineers, located in Lufkin, Texas, to handle the planning and design portion of the new sewer project. A notice to proceed was issued on June 11, 2014 for KSA to begin their planning process.

This planning and design process will first involve the drafting of a preliminary engineering report (PER), which will evaluate and document project details while determining the technical steps required to provide the new sewer service.

District Sewer Exemption Policy / Application Process

Customers are reminded that the District Board of Supervisors has implemented an exemption policy for those customers who wish to apply for exemption from connecting to the new sewer system. Applications are available at Angelina & Neches River Authority, or online at www.acfwater.org.

Once submitted, the applications are forwarded to Angelina County & Cities Health District (ACCHD). Terry Free, with ACCHD, will then go out and inspect the system and issue a report to the District, informing the Board if the system meets State of Texas requirements. The Board will then evaluate the report at its next Board meeting and issue a decision related to the exemption request.

Construction Outlook / Timeline

The new sewer project is projected to request competitive bids for construction beginning Summer of 2015, with actual construction starting the Fall of 2015.

The new sewer system is projected to be fully functional with construction being completed the Fall of 2016.
